FERRARI 246 DINO MONACO GP 1959

3 PHOTO-ETCHED WIRE WHEEL KIT

PARTS LIST

- | | |
|-------------------------------|------------------------------|
| 1. Body | 16. Gear lever |
| 2. Chassis | 17. Dashboard backing plate |
| 3. P/E wire wheel kit | 18. Steering wheel |
| 4. Seat | 19. Carburettor intakes |
| 5. Front axle | 20. Accelerator & brake |
| 6. Front springs | 21. Clutch |
| 7. Top front suspension | 22. Driving mirrors (2) |
| 8. Suspension block | 23. Head rest |
| 9. Bottom front suspension | 24. Exhaust (L & R) |
| 10. Rear springs | 25. Front tyres (2) |
| 11. Top rear suspension | 26. Rear tyres (2) |
| 12. Bottom rear suspension | 27. Vac-forms |
| 13. Rear axle | 28. Transfers |
| 14. Side frame member - left | 30. Etched radiator grille |
| 15. Side frame member - right | 31. Etched dashboard |
| | 32. Splash guards (2) |
| | 33. Exhaust heat shields (2) |

PREPARATION. Remove any flash and mould lines from castings, drilling out holes where necessary. Rubbing down with fine grade wet & dry paper. Check all parts fit prior to painting, adjusting if required. Undercoat body before finishing in final colour. Aerosols of car touch up paint are recommended.

ASSEMBLY. All parts should be painted prior to assembly. A two part epoxy resin is recommended for gluing the model together. Assemble photo-etched wire wheels following the instructions below. Assemble the front and rear suspension units complete with axles as illustrated then attach to chassis. Add tyres to built etched wheels adding to chassis ensuring that the model sits correctly. Fit side member frames in place then add gear lever, accelerator, brake and clutch pedals along with seat. Add decal to dashboard backing plate then at etched fascia. Fit completed dashboard to chassis followed by steering wheel. Add carburettor intakes and head rest to body. Fit body to chassis followed by exhausts, when set add head shields. Trim vac forms for body windscreen and carburettor intake cover and glue in place - do not use super glue for this as it will discolour the material, a water based wood glue is ideal. Fit photo-etched radiator grille, finally add splash guards. Complete the model with the addition of the decals.

PAINTING. Paint the body and splash guards Ferrari Red. Chassis, dashboard front and rear suspension silver. Suspension springs gloss red. Pedals, and exhaust matt black, steering wheel rim, seat and headrest matt navy blue.
