12. Rear leaf spring
13.) Drive shaft
14.) assembly
15. Rear brake drums (2)
16. Axles (2)
17. Clutch pedal
18. Brake/accelerator pedals
19. Gear box
20. Gear lever
21. Dashboard
22. Steering wheel
23. Driving mirror (2)
24. Photo-etched wire wheel kit (4)
25. Tyres (4)
26. Transfers
27. Vac-forms
28. Aero SCREEN

PREPARATION: Remove any flash and mould lines from casting drilling out holes where necessary. Glue driving mirrors to body. Check all parts fit together, adjusting if necessary. Undercoat body and chassis finishing in colours shown below. Aerosols of car touch up paint are recommended.

ASSEMBLY: All parts should be painted prior to assembly. Use a two part epoxy resin to glue the model. Assemble wire wheels following the instructions below. Assemble the front and rear suspension and axles as illustrated and then fix in place. Add gear box, pedals gear lever and seat. Add front and rear bulkheads to body, adding dashboard and steering wheel when dry. Fit body to chassis then glue exhaust in place. Trim vac-form and glue in place. Complete model by addition of transfers.

PAINTING: Paint the body and bulkheads red, chassis, front and rear suspension, dashboard silver, pedals and exhaust matt black, steering wheel brown, heat shield aluminium/silver. The nose section of the body should be yellow.

PARTS LIST

- 1 Inner rim
- 2 Inner photo-etched spokes
- 3 Spacer
- 4 Outer photo-etched spokes
(broken rims)
- 5 Outer rim
- 6 Knock-on

Prior to assembly check parts fit together, adjusting if necessary. Apply glue sparingly where indicated.
